Statewide Summary Reports	175
Operations and Maintenance Summary	184

MESSAGE FROM THE DIRECTOR

The state's transportation system is a tremendous asset for Missouri. A significant component of the state system is the 33,808 miles of roads and 10,424 bridges, both of which rank among the largest for any state in the nation. On average, Missouri drivers pay \$32 per month in fuel taxes and fees to fund the maintenance and improvements to this asset. Over the last 10 years, Missourians have invested in 4,430 projects totaling \$10.8 billion to maintain and improve the system. Looking forward, \$10.4 billion is estimated to be available for project contracts over the next five years for additional improvements.

Including design and project development costs, the 2024-2028 Statewide Transportation Improvement Program totals nearly \$14 billion, the largest program in Missouri history, with more than 1,500 planned construction projects. The five-year program also includes an historic investment from General Revenue funds to widen and improve Interstate 70, fix low-volume minor roads, and upgrade railroad safety crossings. This funding delivers positive trends for the first time in many years particularly in bridge conditions.

This plan is not as fiscally constrained as usual due to inflation in project costs. The total inflation impact in the plan is estimated at \$1.2 billion. Accordingly, the STIP adjusts the schedule for more than 400 projects, enabling MoDOT to absorb inflation and maintain project commitments.

MoDOT works with its regional transportation planning partners to prioritize needs and fund projects that provide the greatest return on investment to taxpayers. Across every region of the state, feedback from Missourians has consistently prioritized maintaining the existing system as the highest priority. Other priorities include projects that improve safety and reliability, spur economic growth and provide more transportation choices.

The 2024-2028 Statewide Transportation Improvement Program totals nearly \$14 billion, the largest program in Missouri history, with more than 1,500 projects.

MESSAGE FROM THE DIRECTOR

With the priority of maintaining the existing system, MoDOT has developed asset management plans for each district with the goal to maintain current pavement and bridge conditions. The asset management plans focus on preventive maintenance improvements to keep roads and bridges in good condition. Research shows preventive maintenance solutions, such as cyclical overlays on roads in good condition, are the most cost-effective approach to taking care of road and bridge assets. Without these preventive maintenance investments, the cost of improving the asset in poor condition can cost four to ten times more.

One of the assets we're striving to maintain is our rural infrastructure. The Missouri Highways and Transportation Commission is continuing its historic investment in minor and low-volume pavement and bridges, with \$1.74 billion invested over the next five years. This includes thousands of lane miles of roadway improvements and hundreds of bridge repairs and replacements.

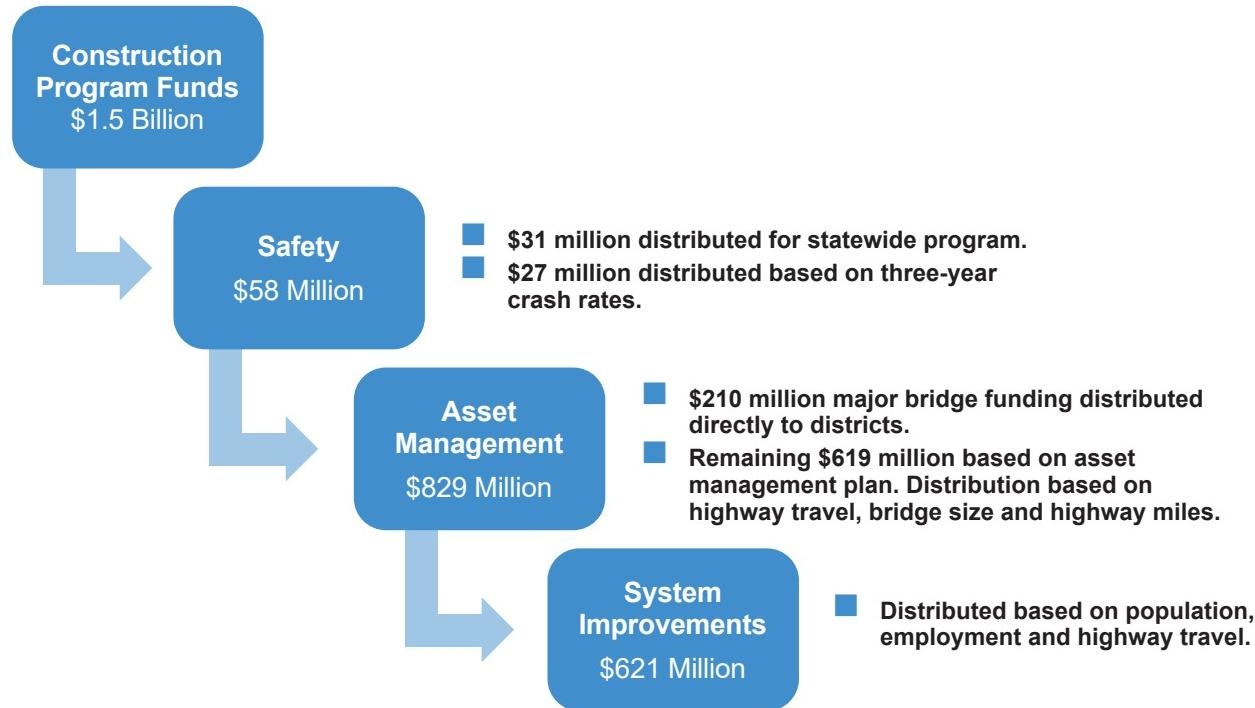

Each MoDOT district receives funding to invest in Missouri's transportation system. Since 2003, the MHTC has used a formula to distribute construction program funds for road and bridge improvements to each of its districts. The formula provides predictable funding for safety improvements, asset management and system improvements.

Working with industry partners, MoDOT stands ready to deliver the record number of projects listed in this document to improve safety, increase mobility and support a prosperous economy for the state of Missouri.

Financial and Regional Planning Process Summary

The majority of funding for state roads and bridges comes from state and federal fuel taxes. Other funding sources include vehicle sales taxes, vehicle and driver licensing fees, interest earned on invested funds and other miscellaneous collections.

These funds are available for MoDOT's operating and construction program budgets. MoDOT's operating budget includes staff and expenses for maintenance, fleet, facilities, information systems and administrative activities. The remaining funds are available for the Program, which is the largest area of MoDOT's budget. STIP funds are allocated annually to districts using the following formula (based on 2023 categories and amounts):

Once construction program funds are distributed to districts, MoDOT collaborates with regional planning groups to identify local priorities based on projected available funding. The regional transportation improvement plans are brought together to form MoDOT's Program. There are two types of regional planning groups in the state: urban areas have Metropolitan Planning Organizations, and rural areas have Regional Planning Commissions. Board members for each of these groups are typically city and county leadership, elected officials and local business owners.

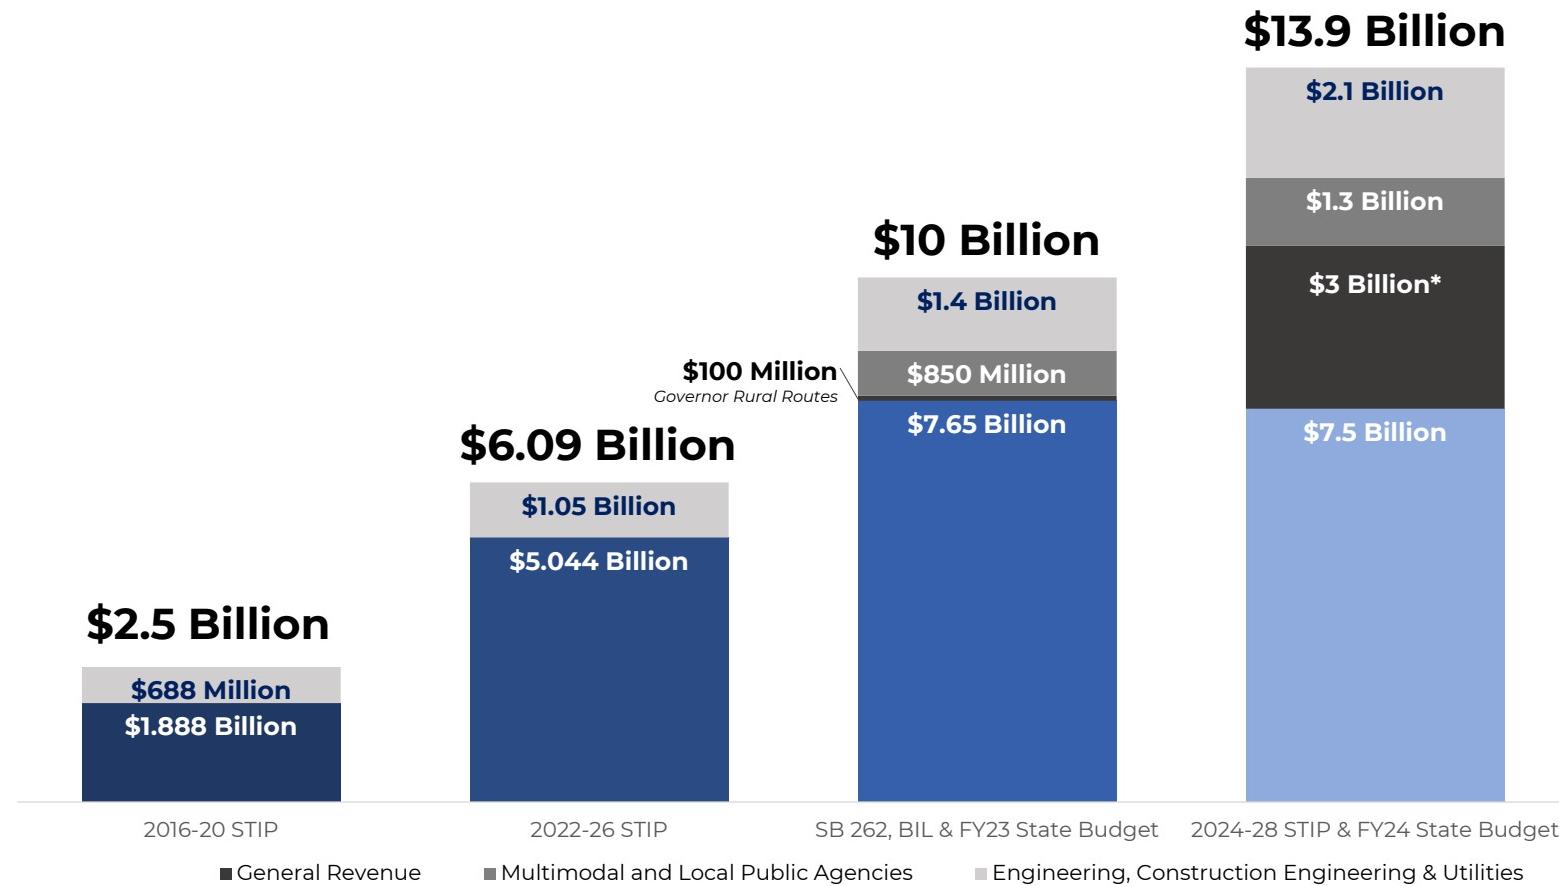

The regional planning groups reach out to local citizens to identify transportation needs. MoDOT staff assists regions to prioritize those needs based on road and bridge conditions, traffic safety data and overall mobility. The prioritization process also includes balancing priorities with available funds.

Reference Information

Asset Management	A strategic practice focused on using limited resources for the preservation, operation and management of the state's transportation infrastructure.
Capital Improvement Project	A transportation improvement that substantially increases the capacity of the transportation system, such as new travel lanes, interchanges or bridges.
Fiscal Year	This is the 12-month period to which the annual Program budget applies. The State of Missouri fiscal year is July 1 through June 30. The Program fiscal year is July 1 through June 30.
General Revenue	State funds lawmakers have the authority to allocate.
Inflation	Seven percent project growth factor compounded annually is applied to right-of-way and construction in programs years 2, 3, 4, and 5.
Lane Miles	Represents the centerline length multiplied by the number of lanes on pavement improvement projects.
Length	Represents the calculated centerline distance on a project based on the primary direction of each route.
Payment Projects	A transportation improvement project administered by a partnering agency. The funding represents MoDOT's state and federal resources allocated to the project. Projects are noted with a "PAYMENT" watermark.
Rural Route Funds	The FY 2024 budget included \$100 million for low-volume minor routes across the state.
SB262	The 2021 senate bill increases Missouri's fuel tax by 2.5 cents annually each year for five years from 17 cents to 29.5 cents in 2025, the first Missouri state fuel tax increase passed in 25 years.
Est. Total Cost	Represents the planning estimates of the total costs of the project. These include: preliminary engineering, right-of-way, utilities, construction and construction engineering.

ABOUT THIS PROGRAM

The annual Statewide Transportation Improvement Program (STIP) provides information regarding the different levels of available state and federal road and bridge funds. The FY 2024-2028 program provides a record \$13.9 billion and 1,500 projects, including an historic \$3 billion in General Revenue for Legislatively Designated Road and Bridge projects and multimodal projects.

*General Revenue for the Reconstruction and Expansion of Interstate 70, Governor Rural Routes, and more

ABOUT THIS PROGRAM

This Road and Bridge program of the STIP is not fully programmed as our annual common practice, due in large part to ongoing inflation. This program is 90% programmed as a result.

The 2021 passage of state Senate Bill 262 increasing the Missouri state fuel tax for the first time in 25 years as well as the increase in federal funds from November 2021 Bipartisan Infrastructure Law (BIL) are shown in the list of projects on the following pages. Different levels of funding associated with SB 262, BIL and the potential debt issued by the Missouri Highways and Transportation Commission may affect this project list. Some projects on the page are grayed out. The gray color represents projects which could be removed with the repeal of SB 262, or because the project's bids exceeded the program estimate. Both possible actions are to help ensure the STIP's fiscal constraint.

SUMMARY OF AT RISK PROJECTS

	Number of Projects	Length	Lane Miles	Number of Bridges	Total Est. Cost (\$1,000)
Northwest	25	183.06	419.97	23	89,792

Operations and Maintenance Summary

Calendar Year 2023 - 2025

The information contained on the following pages shows planned work as well as routine maintenance work for the next three calendar years. The planned maintenance work is programmed at 80% the first year, 60% the second year and 40% the third year. The routine maintenance work is a projection of responsive work for the next three years, based on historic data.

	<u>Northwest</u>	<u>Northeast</u>	<u>Kansas City</u>	<u>Central</u>	<u>St. Louis</u>	<u>Southwest</u>	<u>Southeast</u>	<u>Central Office</u>	<u>Total</u> (\$1,000)
